Discuss about Korean history & culture

Participate in volunteer activities

Every 2<sup>nd</sup> & 4<sup>th</sup> Wednesday at 7 pm

Learn, Discuss, Volunteer

Make FRIENDS & Have FUN!!

# After the internship..

I am Wang Haitao from School of International Studies, Sun Yat-Sen Univ., China. And I am now studying in Univ. of Seoul as an exchange student. My time abroad has flown so fast, during which, however, I received lots of love and warm concerns. I am always grateful for the experience that I have got working for IICI, through which I not only learned knowledge about Korean culture, but ways to socialize with others, especially Korean people. I have also worked with friends from various countries, such as the United States, Laos, Vietnam, France and Spain. We passed an interview and also one-month training, and then officially began to work. My major work in IICI was divided into two parts, one part was working at YCC as an instructor, the other was Marie Story.

Our jobs and training mainly focused on three ancient palaces of Korea (Gyeongbokgung, Changdeokgung and Deoksugung), Seodaemun Prison hall and also some museums. Through training, I've got to know more about Korean culture which shows the elite of Korea. Moreover, it made me feel respectful that Korean citizens, especially students, are ardently in love of their nation and culture. When I worked as a tutor at YCC, I found that those who guided the tourists were not college undergraduates, but were some lovely and vital elementary school and middle school students. Despite their young age, they knew their nation's culture as well as adults and they could speak surprisingly fluent English. It reminded me of myself who, at such a young age, could neither speak such excellent English nor have the courage to talk to foreigners when I saw them introducing Korean culture to foreign tourists. I've learnt a lot from these young students. Even on the coldest day within the recent 50 years of Seoul, these children, just wearing an orange coat, were waiting to guide foreign tourists at the exit of metro. I think it's their love for Korea and their willing and passion to spread Korean culture that encouraged them to overcome all the obstacles. As a tutor, all I could do was to match them with a group of tourists; as an elder brother, all I could do was to protect them from not being hurt; as a foreigner, all I could do was to admire, respect and learn. I felt warm and gratified in this cold winter because of these children's devotion to their motherland.

Hence, it is not only an unforgettable experience, but a good access for me to make friends as well as practice oral English and Korean. I would like to thank for the loves given by president and teachers from IICI, through which I have felt a sense of home and family. Along with the love for Korean culture and gratitude for IICI, I will persevere in this job to the end.

Period : 2011. 9 ~ 2012. 7

# After the internship..

Essay about my impressions of working at ICI (Period : 2012. 9 ~ 12)

My name is Justine, I am 20 years old and I come from Marseille in France. I arrived in Seoul for one year in August 2012 as an exchange student in business at the University of Seoul.

Coming to Korea, learning Korean language and culture, experiencing the Korean way of life has always been my dream. Joining the internship proposed by ICI was in that way a good opportunity. I also had the chance to experience some part of the Korean working culture, which is very important for me because I would like to stay in Korea after my studies.

I worked at the YCC office and my task was mainly to take care of Korean students that are volunteers to give free tour in English to foreigners. I had to match the students with the foreigners by asking them directly in the street. In that way I could talk to people from every part of the world. I had to give up my shyness and stayed motivated even when foreigners were not interested.

At the beginning it was difficult to exchange with the Korean students because they are very shy. But as time passed I learned how to break the ice and then I could have very interesting conversation and I had good time. Also my colleagues really helped me in that way: they made me and the other foreign interns get integrated in the team and also they introduced to me the Korean students.

My colleagues are what I will remember the most about my internship. I could share very good moments with them. They taught me a lot about Korean language and culture. We could also share our own experiences.

Three days are unforgettable for me. One is my first time at ICI. We visited many places in Seoul and also participated to the tour given to the young Korean children of Gyeongbok palace. They were so cute and lovely.

The second one is the day I went to Amsa festival. There I learned how to play Korean traditional games like Yut Nori. I played all the day with Korean children that where very curious to play Yut Nori with a foreigner. My only regret is that my Korean was just basic.

The third one is when I followed one Korean student giving the tour of Gyeongbok palace to a Korean family that used to live in the USA for 10 years. Their children were born there and so they came back to teach them the Korean culture. I exchanged a lot with them, they were curious about me and I was curious about how the children feel about their new Korean life.

One thing that surprised me was that the company paid for our lunch. In France it doesn't happen. I was really thankful for this. Eating lunch with my colleague is also another interesting and good moment to share.

My only regret is that my work wasn't very varied. I wish I could go again the Gyeongbok palace to teach the young children.

To conclude, I am very happy with my internship at ICI, it is a good experience. And the main point is that it allowed me to meet a lot of people.
