Korean [Language]

Being able to speak Korean makes you much more marketable and increases your likelihood of getting a job in Korea. A good command of the Korean language will not only benefit you in your career but also help you to master daily life and participate more actively in Korean society. English is not widely spoken in everyday life or in the workplace in Korea.

Therefore, we advise you to learn Korean as much as possible prior to your Working Holiday in Korea. Korean language courses are taught at several universities around the world. The Korean Embassy and Consulates in your home country can also help you locate opportunities to learn Korean near your vicinity.

Housing

※ When you first arrive, you may wish to stay in a youth hostel or guest house as this is the good way to obtain initial guidance and orientation at a reasonable price.

[Short-term Stay]

Guest House

Guest houses are Korean homes which have been converted for the exclusive use of guest accommodation. They provide an authentic Korean experience while providing opportunities to interact with Korean locals and other travelers.

Youth Hostels

Youth hostels are found in many different locations in Korea providing affordable, quality accommodation for visitors. There are a total of 70 youth hostels located in every major city throughout Korea. Rates range between KRW 15,000 and KRW 40,000.

[Long-term Stay]

Homestay

Living as part of a Korean-speaking household, you will have your own bedroom and have meals with your hosts. It is a great way to meet Koreans and share their way of life. You will also be able to improve your fluency in Korean.

One Room

The One Room is a widespread and extremely popular housing option among students and single adults. The One Room is a large single room equipped with a bathroom, kitchenette and living space.

Goshiwon (Goshitel or Livingtel)

Goshiwon was initially for people who were preparing for national exams to become public servants. However, now that regular One Room or studio apartments are demanding high rent, Goshiwon is becoming a popular accommodation choice. It is fully furnished and prices can go higher if there is a private bathroom and window within the room itself.

Officetel/Studio Apartment

The “Officetel” is a combination of Office and Hotel such that people can live and work in the same building. Many of them come fully furnished. The Officetel is also more expensive and offers larger living spaces/facilities than the One Room. Tenants are also responsible for monthly maintenance fees and additional utility fees.

Residence

Serviced residences are furnished apartment buildings with hotel-like services. They have all of the necessities of a modern apartment including an indoor swimming pool, exercise room and amenities within each unit. These units are usually two to three times bigger than your average hotel room and usually include a kitchen. Some residences can also offer tenant cleaning and laundry services.

Apartment

Apartments in Korea are the most popular housing options among Koreans and its popularity is explained by the fact that tenants are becoming ever more demanding with comfort. Nearly all apartment complexes have facilities nearby such as supermarkets, district offices, and also easy access to public transportation. The majority of apartment style residences are unfurnished.

How to find your accommodation

The housing market in Korean cities is very competitive and there is an obvious shortage of reasonably-priced residences.

Whether you rent a one-room or an officetel, a rental contract must be signed. Signing a contract without a clear understanding of your rights and responsibilities can result in costly consequences. It is advisable to have the contract checked by your Korean friends.

Please be aware that it can be difficult to find accommodation during the months of February and August due to the start of the school semester.

※ Information on accommodation, residences, and convenience facilities for foreign nationals in Seoul:
<http://english.seoul.go.kr/service/living/housing/1-wolse-jeonse/>

There are many ways to go about researching for a residence.

Online

A convenient and cost efficient way to search for housing is through the internet. The internet can provide quality resources such as real estate websites and listings of property from an online newspaper.

※ Real Estate Agencies for foreigners:

<https://land.seoul.go.kr:444/land/broker/globalbrokerInfo.do>

Offline

Although housing advertisements through the internet and newspapers could be an option for locating a perfect house, working with a real estate agent in person is prevalent among potential tenants in Korea. They are easily found in every neighborhood. Many offices of the agents have signboards in front of their office or on their windows that show properties currently available. Once you have found a suitable agent, you can specifically notify him/her about your specific requirements and your available budget. He/she will guide you by showing you a range of houses and you can choose one that matches your needs. The agent should check the ownership of the apartment and authenticate the identity of the owner.

Working in Korea

Like in every other country around the world, finding a job in Korea can be difficult, particularly if you do not have knowledge of the Korean language. Fluency in Korean is definitely a great advantage for obtaining a job in Korea. However, if you have the right profile and the right approach, you will most likely succeed in any job. Working in Korea as opposed to coming as a tourist is a great way to integrate yourself into Korean culture & life and to make new friends.
